

## Statement on Extended Producer Responsibility (EPR) and WEEE

To whom it may concern,

Electrical and electronic waste contains a complex mixture of materials, some of which are hazardous. These can cause major environmental and health problems if the discarded devices are not managed properly. In addition, modern electronics contain rare and expensive resources, which can be recycled and re-used if the waste is effectively managed.

Improving the collection, treatment and recycling of electrical and electronic equipment (EEE) at the end of their life can improve sustainable production and consumption, increase resource efficiency and contribute to the circular economy.

Hirschmann Automation and Control GmbH and Belden Deutschland GmbH have both registered according to their extended producer responsibility at Stiftung EAR in Germany.

Following WEEE registration numbers are considered as proof of EPR conformity and can be obtained in the manufacturer directory on: <https://www.ear-system.de/ear-verzeichnis/hersteller>

- WEEE registration number for Hirschmann Automation and Control GmbH: **DE 10138795**
- WEEE registration number for Belden Deutschland GmbH: **DE 87082272**
