Compliance Statement: Regulation (EU) 2019/2021 (EU POPs)

Dear Customer,

Regulation (EU) 2019/2021 about persistent organic pollutants (POP) deals with the protection of the human health and the environment against these substances by a preferably early elimination of production or accordingly by the limitation to a minimum regarding manufacturing, placing on the market and usage of these substances.

Furthermore, the regulation defines provisions about waste which consist of these substances, in which these substances are contained, or which are contaminated by these substances. Hirschmann Automation and Control GmbH has been aware of the responsibilities for protecting the environment and human health. We have always kept on tracking the update of prohibited and restricted substances listed in the POPs Regulation and verify the presence of any substance in our products.

Based on the verified information from our suppliers, our products are in compliance with the POPs Regulation and don't contain substances subject to prohibitions listed in Annex I to Regulation (EU) 2019/1021. We continue to follow up the update of the POPs regulation and ensure the conformity of our products.

Kind regards
Hirschmann Automation and Control GmbH
