Conflict Minerals Information

Belden conducts an annual supplier data collection process to support its Conflict Minerals due diligence and reporting activities.

The current supplier data collection cycle is still in progress; therefore, updated Conflict Minerals reporting data is not expected to be available until Q1 2027, following completion of the supplier data review and data refresh process.

Until then, the most recently published Conflict Minerals information remains the latest validated data available.

Best regards,
Hirschmann Automation and Control GmbH
Belden Deutschland GmbH
