Declaration for California Proposition 65

Dear Customer,

during normal operations it is not required to touch our products in any way.

Under the structure of California's Safe Drinking Water & Toxic Enforcement Act of 1986 (Proposition 65, Prop 65, CP65) certain parts of Hirschmann / Lumberg products may contain one or more chemicals above the safe harbor levels on the Prop 65 List, for example lead and Tetrabromobisphenol A (TBBPA). Under normal conditions of use, the lead or other chemicals do not free up from the product.

For details, please consult our Compliance LookUp Table:

<https://www.doc.hirschmann.com/certificates.html>

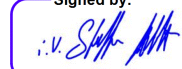

Please note, however, that up to 3% lead may be present in brass alloy contacts. These brass alloy contacts, as well as TBBPA, are within the device are not intended to be touched by users. Nickel is metallically bound within a passivation layer and is not readily transferable during normal handling. Any contact with nickel-passivation is limited to short-term handling during installation or maintenance of this professional/industrial product. No prolonged skin contact or intended oral exposure occurs under the intended conditions of use. Based on this intended use scenario, no Proposition 65 warning is considered necessary.

This information is based on the Prop 65 chemical list as of the date of this letter.

Best regards,

Hirschmann Automation and Control GmbH
