Subject: Important Supply Chain Disclosure Regarding Russian-Origin Titanium

To Our Valued Customers,

In our ongoing commitment to supply chain transparency and compliance, we are providing the following update regarding the use of Russian-origin titanium in our products.

We can confirm that, based on our current supply chain data, the mechanical and electronic components used in our products do not contain Russian-origin titanium.

However, regarding Printed Circuit Board Assemblies (PCBAs), our information gathering process is still ongoing. The complex and multi-layered nature of the PCBA supply chain requires a more extensive review. Therefore, we are unable to confirm at this time that our PCBAs are free of Russian-origin titanium.

We have initiated a thorough data collection effort with our PCBA suppliers and are actively working to obtain the necessary declarations. We will provide a further update as soon as this process is complete. We appreciate your understanding and partnership as we navigate these global supply chain challenges.

Sincerely,

Best regards,
Hirschmann Automation and Control GmbH
