Mounting Note

Wall mounting bracket for BRS device variants in metal casing

- **Certified usage**
  The wall mounting bracket with the order number 942 321-001 is suitable for all BRS device variants in metal casing in narrow, medium and wide version.

  The wall mounting bracket
  ➤ is an alternative to the DIN rail if this is not available.
  ➤ is an alternative to the DIN rail if this does not fulfill the necessary vibration requirements.
**Scope of delivery**

<table>
<thead>
<tr>
<th>Amount</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2 ×</td>
<td>The same wall mounting bracket for both the left and right side of the device</td>
</tr>
<tr>
<td>4 ×</td>
<td>M3x10 screws for fastening the wall mounting brackets to the device</td>
</tr>
<tr>
<td>1 ×</td>
<td>Mounting Note</td>
</tr>
</tbody>
</table>

**Mounting of the wall bracket**

Prepare the following tools:

<table>
<thead>
<tr>
<th>Electric drill</th>
<th>Screwdriver</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Torx size: T10</td>
</tr>
</tbody>
</table>

Proceed as follows:
- Remove the 2 rear screws from the casing on the left and right side of the device *(see figure 1)*.
- Fasten the wall mounting brackets to the casing. For this, use the M3x10 screws provided. The tightening torque is 0.6 Nm to 0.65 Nm (5.3 lb-in to 5.7 lb-in)
- Mark the drill holes on the wall. For the dimensions see *figure 2* and *figure 3*.
- Drill the holes in the wall.
- Screw the device with the wall mounting bracket to the wall.
