 - For an optimized PC configuration for your solution, contact <https://hirschmann-support.belden.com>.
- Installation:
 - The table below lists the HiProvision PC installation steps (Server + Remote Client).
Follow the steps below (Portal = <https://hiprovision.hirschmann.com>).

Step	New / Upgrade (*)	Description	
1	New	Get a Serial Key	Portal → Login → Shortcuts → Licenses HiProvision → Serial Key
2	New / Upgrade	Download HiProvision	Portal → Login → Shortcuts → Downloads (Dragon PTN)
3	New / Upgrade	Download MySQL Server Installer	Portal → Login → Shortcuts → Downloads (Dragon PTN)
4	New / Upgrade	Download HiProvision MySQL Support Pack	Portal → Login → Shortcuts → Downloads (Dragon PTN)
5	New / Upgrade	On the HiProvision PC: Create a temporary folder C:\temp_R4.0.2DR and unzip the downloaded zip-files in this folder	
6	New / Upgrade	Place mysql-installer-community-5.6.23.0.msi in C:\temp_R4.0.2DR\HiProvision_MySQL_support_pack_v3.4\MySQL\mysql	
7	New / Upgrade	Execute HiProvision_MySQL_support_pack_v3.4\install.cmd → (1) automatic installation (=default) for all packages (**), (***)	
8	New / Upgrade	Execute 01.Setup\HiProvision_<HiProvision Version>.msi and follow the installer instructions on screen. <ul style="list-style-type: none"> • Complete button = full installation = all 5 icons (see below) on desktop. • Custom button → Shortcuts = custom installation, only selected icons on desktop. <div style="text-align: center;">  </div> In the 'Dragon PTN and HiProvision Operation' manual, follow the steps in 'Start Up and Initialize HiProvision' for further processing.	

(*) : For an upgrade from Dragon PTN RX.yDR up to RX.zDR, only perform the Upgrade steps. In any other case, follow all the New steps.

(**) : Installs following packages (if not installed yet): 7-Zip, Microsoft .NET, Microsoft VC Redistributable, Oracle MySQL Server.

(***) : The installation of Microsoft .NET requires a PC reboot. After the reboot, HiProvision_MySQL_support_pack_v3.4\install.cmd must be executed again.
